Microsoft Licensing Support / CSP

M365, security, and specialty SKUs — the easiest entry point into every other conversation.

Overview

Wired CIO sells and supports Microsoft licensing as a CSP: M365 Business Basic/Standard/Premium, O365/M365 E1/E3/E5, F1/F3, EMS, Power BI Pro/Premium, M365 Copilot, Defender variants, Entra ID P1/P2, Teams Phone, and Intune, among others.

Discovery Questions — Ask On the Call

1. What licenses are you on today, and who manages that — Microsoft direct, another partner, internal IT?
2. Roughly how many seats/users?
3. Any known gaps — no MFA/security licensing, no Copilot, no advanced backup?
4. When does your current agreement renew?
5. Who owns procurement and budget for this?

Buying Signals — Listen For This Language

- + A confirmed seat count of 15 or more is our internal strong-signal threshold — smaller confirmed counts still get worked, just at lower priority.
- + Any of the named SKUs above mentioned by name.

Red Flags — Not a Fit / Disqualify

- x Single-seat/freelancer language.
- x They want Microsoft's own direct support instead of a partner.

Cross-Sell / Related Offerings

Licensing is the easiest entry point into every other conversation — MSP, security, Copilot, Dynamics. Always ask what's NOT currently licensed, that's usually the real opening.
